

## NORTH CAROLINA'S Top Doctors

**North Carolina's most respected doctors in 62 specialties are presented in this annual report. Those cited were selected by their peers with a goal of saluting the state's leading medical practitioners.**

**M**ethodology and disclaimer: This report was produced by DataJoe Research, a software and research company specializing in data collection and verification. The Lakewood, Colo.-based company conducts various nominations across the United States on behalf of publishers. To create the "top doctors" list, DataJoe Research facilitated an online peer-voting process, also referencing government sources. DataJoe then tallied the votes per category for each doctor to isolate the top nominees in each category. After collecting nominations and additional information, DataJoe checked and confirmed that each published winner had a current, active license status with the state regulatory board. If we were not able to find evidence of a doctor's current, active registration with the state regulatory board, that doctor was excluded from the list. In addition, any doctor who has been disciplined, up to the time-frame of our review process for an infraction by the state regulatory board, was excluded from the list. Finally, DataJoe presented the tallied result to the magazine for its final review and adjustments.

We recognize that there are many good doctors who are not

shown in this representative list. This is only a sampling of the huge array of talented professionals within the region. Inclusion in the list is based on the opinions of responding doctors in the region and the results of our research campaign. We take time and energy to ensure fair voting, although we understand that the results of this survey nomination are not an objective metric. We certainly do not discount the fact that many, many good and effective doctors may not appear on the list.

DataJoe uses best practices and exercises great care in assembling content for this list. DataJoe does not warrant that the data contained within the list are complete or accurate. DataJoe does not assume, and hereby disclaims, any liability to any person for any loss or damage caused by errors or omissions herein whether such errors or omissions result from negligence, accident, or any other cause. All rights reserved. No commercial use of the information in this list may be made without written permission from DataJoe.
